Medical Imaging 1999: Physics of Medical Imaging

Application of Optical Instrumentation in Medicine XI

Benefit/risk of mammographic screening

S. A. Feig, [1983]

National Council on Radiation Protection and Measurements (NCRP) Scientific Committee 72-Radiation protection in clinical mammography: a progress report

L. N. Rothenberg, [1983]

Quality assurance for computed tomography - correlation with system performance

D. R. Jacobson, [1983]

The rationale and efficacy of applying multiple imaging techniques for breast examination: x-ray mammography and ultrasound visualization

E. Kelly-Fry, [1983]

Absorbed dose and image quality of xeromammography

P. P. Fatouros, H. Goodman, G. U. Rao, M. C. Beachley, S. K. Jani, D. Bourland, [1983]

Effects of kVp variation and x-ray tube filtration on the mammographic examination

S. Malik, M. E. Masterson, M. Hunt, [1983]

Sonographic detectability of breast calcifications

E. A. Sickles, [1983]

Signal-to-noise ratio, dynamic range and contrast sensitivity of radiographic imaging systems

R. P. Schwenker, [1983]

Variations in task and the ideal observer

K. M. Hanson, [1983]

An empirical investigation of variability in contrast-detail diagram measurements

Leh-Nien D. Loo, K. Doi, M. Ishida, C. E. Metz, Heang-Ping Chan, Y. Higashida, Y. Kodera, [1983]

A method for estimating x-ray scatter spectra

W. E. Moore, [1983]

Cardiovascular cine film quality

C. C. Scheid, [1983]

Effect of system temporal response in radiological video imaging

J. A. Rowlands, D. M. Hynes, R. Harris, E. W. Edmonds, D. Baranoski, [1983]

Application of Optical Instrumentation in Medicine XI (*cont.*)

The photographic effect of long term persistency of radiographic screens

R. Bollen, [1983]

Optical dose utilization with variable x-ray intensity in digital radiography

D. L. Parker, P. D. Clayton, L. R. Tarbox, P. L. VonBehren, [1983]

Spatial frequency filtering in digital subtraction angiography (DSA) by real-time digital video convolution

J. T. Dobbins III, M. S. Van Lysel, B. H. Hasegawa, W. W. Peppler, C. A. Mistretta, [1983]

A study of the potential for digital radiographic data acquisition for radiation therapy treatment planning

M. Edwards, J. Keller, G. Hobson, [1983]

Comparison of imaging characteristic of digital subtraction angiography utilizing geometrical magnification and electro-optical magnification

Pei-Jan Paul Lin, R. A. Mintzer, [1983]

Performance evaluation and quality assurance of digital fluoroscopy imaging systems

T. L. Houk, S. K. Mun, [1983]

Fluoroscopic image quality requirements for coronary angioplasty

C. C. Scheid, [1983]

The status of quality assurance for computed tomography systems

J. L. McCrohan, C. K. Showalter, R. L. Burkhart, F. G.D. Shuman, [1983]

Quality assurance in a national breast screening study

M. J. Yaffe, G. E. Mawdsley, R. M. Nishikawa, [1983]

Short exposure time characteristics of x-ray generators

B. A. Horn, K. C. Luk, D. M. Thomasson, C. E. Finney, [1983]

Dynamic flow phantoms for digital radiography (DR) and nuclear magnetic resonance (NMR)

P. T. Cahill, J. B. Kneeland, R. J. Knowles, M. Peterson, S. Saddenkni, T. Sos, [1983]

Description of a digital tomosynthesis (DTS) system

R. C. Murray, Jr., K. R. Maravilla, [1983]

The effect of photon transport on the performance of electronic imaging detectors

M. J. Flynn, S. Wilderman, J. Mulvaney, [1983]

Application of Optical Instrumentation in Medicine XI (*cont.*)

An investigation of digital mammographic imaging

R. M. Nishikawa, M. J. Yaffe, [1983]

Dual energy mammographic imaging

P. C. Johns, D. J. Drost, M. J. Yaffe, A. Fenster, [1983]

Digital radiography systems

K. N. Vizu, [1983]

Single slit digital radiography: some practical considerations

M. M. Tesic, R. A. Sones, D. R. Morgan, [1983]

A system for digital videodensitometry

G. A. Johnson, N. Daniele, S. Suddarth, N. R. Dunnick, [1983]

Technical alternatives in nuclear magnetic resonance (NMR) imaging

H. A. Hart, Jr., P. A. Bottomley, W. A. Edelstein, S. G. Karr, W. M. Leue, O. M. Mueller, R. W. Redington, J. F. Schenck, L. S. Smith, D. Vatis, [1983]

Performance specifications of a 0.15 Tesla medical magnetic resonance unit

W. Pavlicek, T. F. Meaney, [1983]

Architectural considerations in a medical magnetic resonance imaging facility

W. Pavlicek, T. F. Meaney, M. Cutting, I. Budish, [1983]

The dependence of nuclear magnetic resonance (NMR) image contrast on intrinsic and operator-selectable parameters

F. W. Wehrli, J. R. MacFall, G. H. Glover, [1983]

Magnetic resonance imaging using permanent magnets

C. G. Masi, [1983]

Biexponential T_2 discrimination of normal, benign, and malignant human breast tissue

M. B. McSweeney, W. C. Small, J. H. Goldstein, C. W. Sewell, R. W. Powell, [1983]

Selective exposure radiography using digitally-formed x-ray beam attenuators

B. H. Hasegawa, J. T. Dobbins III, W. W. Pepler, B. V. Kudva, K. M. Melbye, M. S. Van Lysel, C. S. Lee, S. Naimuddin, J. C. Lancaster, C. A. Mistretta, [1983]

Electrical impedance imaging of the body with nonlinear reconstruction

Y. Kim, W. J. Tompkins, J. G. Webster, [1983]

Application of Optical Instrumentation in Medicine XI

Radioluminescent imaging: factors affecting total light output

G. Zweig, D. A. Zweig, [1983]

Computer information system for nuclear medicine

P. T. Cahill, C. Edwards, R. J.R. Knowles, O. Tsen, [1983]

Application of Optical Instrumentation in Medicine XII

More unified analysis of medical imaging system SNR characteristics

R. F. Wagner, D. G. Brown, [1984]

Optimal object and edge localization in the presence of correlated noise

K. M. Hanson, [1984]

Statistical efficiency of perceptual decisions

A. E. Burgess, [1984]

Determination of inherent contrast resolution in x-ray imaging using electron density and effective atomic number differences

F. A. DiBianca, J. E. Fetter, M. D. Barker, [1984]

Calculating radiological images

E. P. Muntz, H. Bernstein, H. Jafroudi, R. J. Jennings, [1984]

Information detection in diagnostic radiology

H. J. Zweig, H. H. Hines, J. A. Seibert, [1984]

A generalized detective quantum efficiency (DQE) approach to the analysis of x-ray imaging

M. J. Tapiovaara, R. F. Wagner, [1984]

Microwave thermoelastic tissue imaging

K. H. Chan, J. C. Lin, R. G. Olsen, [1984]

System for acquisition, analysis, and archiving of ophthalmic images (IS-2000)

M. R. Nelson, J. L. Cambier, S. I. Brown, P. G. Rehkopg, J. W. Warnicki, [1984]

Real time pattern recognition and feature analysis from video signals applied to eye movement and pupillary reflex

J. R. Charlier, J.-L. Bariseau, V. Chuffart, F. Marsy, J.-C. Hache, [1984]

An analysis of the fundamental limitations of screen-film systems for x-ray detection, I. General theory

R. Shaw, R. L. Van Metter, [1984]

An analysis of the fundamental limitations of screen-film systems for x-ray detection, II. Model Calculations

R. Shaw, R. L. Van Metter, [1984]

Application of Optical Instrumentation in Medicine XII (*cont.*)

Application of maximum-entropy spectrum analysis to the measurement of low-frequency radiographic noise spectra

E. A. Trabka, P. C. Bunch, [1984]

Signal-to-noise measurements for a screen-film system

P. C. Bunch, R. Shaw, R. L. Van Metter, [1984]

Speed of screen film systems according to temperature

R. Bollen, [1984]

Efficiency of rare-earth phosphors as a function of temperature

D. R. Shearer, S. Kimball, [1984]

The sensitivity to technological innovations of the doses delivered by optimized mammography systems

H. Jafroudi, E. P. Muntz, [1984]

High resolution digital radiography using a proximity type image intensifier

S. P. Wang, J. Zeilenga, R. P. Hunt, D. F. Specht, R. S. Enck, [1984]

A photo-diode array angiographic system for imaging and blood flow measurements

I.A. Cunningham, B. B. Hobbs, A. Fenster, [1984]

Preliminary experience with a charged selenium plate projection x-ray system

P. J. Papin, N. J. Mankovich, Z. Barbaric, H. K. Huang, [1984]

Feasibility of selective exposure radiography

B. H. Hasegawa, J. T. Dobbins III, W. W. Peppler, J. T. Cusma, C. A. Mistretta, B. V. Kidva, M. S. Van Lysel, C -S. Lee, S. Naimuddin, J. C. Lancaster, S. Molloi, [1984]

Effects of kVp on DSA images

S. P. Wang, S. A. Schoolman, [1984]

Thermal analysis of solid, rotating, x-ray tube anodes: new results and a comparison with prior studies

S. Whitaker, [1984]

Numerical analysis of the temperature distribution in a liquid-cooled rotating x-ray anode

F. E. Torres, [1984]

A new high heat load x-ray tube

A.H. Iverson, S. Whitaker, [1984]

Application of Optical Instrumentation in Medicine XII

The Oldelft electro-optical cross sectional reconstruction system: an estimation of its channel capacity

R. J. Geluk, [1984]

Fourier coded aperture imaging in nuclear medicine

C. Chou, [1984]

Gamma ray imaging by single grating aperture

C. Chou, H. J. King, [1984]

Quantum noise analysis of the single grating aperture gamma ray imaging

C. Chou, S. P. Chang, L. S. Chen, [1984]

A third generation digital gamma camera

D. W. Heyda, F. R. Croteau, J. A. Govaert, [1984]

Medical Imaging and Instrumentation '84

Application of a digital beam attenuator to chest radiography

B. H. Hasegawa, S. Naimuddin, J. T. Dobbins III, W. W. Peppler, J. T. Cusma, M. S. Van Lysel, J. C. Lancaster, C.-S. Lee, S. Molloy, C. A. Mistretta, B. V. Kudva, K. M. Melbye, [1984]

Variable-thickness chest filtration: the effect of high atomic number filter materials

C. J. Vyborny, H. MacMahon, K. Doi, M. Sabau, [1984]

The effect of pixel size on the detection rate of early pulmonary sarcoidosis in digital chest radiographic systems

H. MacMahon, C. Vyborny, G. Powell, K. Doi, C. E. Metz, [1984]

Results of a six-state pilot study to collect exposure technique and processing data in chest radiography

P. F. Butler, B. J. Conway, O. H. Suleiman, G. H. Koustenis, C. K. Showalter, [1984]

Video cameras for video imaging

J. M. Sandrik, [1984]

Video requirements for digital subtraction angiography

H. H. Hines, J. A. Seibert, D. J. Borger, [1984]

Trouble-shooting multiformat camera applications

D. H. Haddick, [1984]

Videotape recorders - their care and feeding

J. C. Lawson, [1984]

Quality control of video components and display devices

J. E. Gray, J. Stears, M. Wondrow, [1984]

Video standards and performance tests of video systems

J. H. Harshbarger, [1984]

SMPTE test pattern for certification of medical diagnostic display devices

K. G. Lisk, [1984]

Film-screen speed system considerations

R. S. Holland, [1984]

Crossover and MTF characteristics of a tabular-grain x-ray film

K. E. Huff, P. W. Wagner, [1984]

Medical Imaging and Instrumentation '84

Comparison of signal-to-noise ratios for some new screen-film systems

P. C. Bunch, [1984]

The impact of anti-crossover radiographic film in clinical practice

J. W. Gorski, J. Skucas, [1984]

Rotatable spoke fluoroscopic test object

R. J. Moore, [1984]

Blood flow determination using IV DSA

C. R. Wilson, D. Smith, W. D. Foley, S. Molloy, [1984]

Arterial blood flow measurement using digital subtraction angiography (DSA)

D. K. Swanson, P. D. Myerowitz, M. S. Van Lysel, W. W. Peppler, B. L. Fields, K. M. Watson, J. O'Connor, [1984]

Digital subtraction angiography (DSA) techniques for the evaluation of breast lesions

M. J. Flynn, L. Ackerman, S. Wilderman, R. Block, C. Watt, M. Burke, P. C. Shetty, [1984]

Evaluation of phantoms designed for digital fluorographic systems

P.-J. P. Lin, [1984]

X-ray imaging with two-dimensional charge-coupled device (CCD) arrays

J. M. Herron, W. H. Kennedy, D. Gur, S. L. Miller, W. F. Good, B. C. Good, R. E. Latchaw, H. Yonas, [1984]

Film-screen digital radiography

R. P. Schwenker, [1984]

Screen-film mammography update: x-ray units, breast compression, grids, screen-film characteristics and radiation doses

A.G. Haus, [1984]

A skeptical look at a (digital) sacred cow

J. E. Gray, P. R. Karsell, G. P. Becker, D. G. Gehring, [1984]

The use of a digital store to provide pulsed fluoroscopy and stored images during gastrointestinal examinations

D. M. Hynes, E. W. Edmonds, J. A. Rowlands, W. W. Pack, [1984]

Preliminary clinical studies using a self scanning linear diode array to obtain 1024 x 1024 digital radiographs

D. Sashin, B. S. Slasky, E. J. Sternglass, K. M. Bron, J. M. Herron, W. H. Kennedy, J. W. Boyer, B. R. Girdany, R. W. Simpson, J. A. Horton, R. J. Hoy, J. H. Feist, B. F. Uretsky, [1984]

Medical Imaging and Instrumentation '84 (*cont.*)

Experience with the SMPTE test pattern in quality control of magnetic resonance images

M.J. Bronskill, [1984]

Motion artifact in 2DFT MR imaging

A.D. Nelson, R. J. Alfidi, A. Lent, M. Clampitt, M. Kritzer, F. Miraldi, C. Schultz, S. Kopiwoda, [1984]

Absorption of NMR signals at high frequencies in physiological phantoms

R. M. Hankelman, M. J. Bronskill, P. R. Goebel, [1984]

Video recording paper - innovation in video recording

H. Shalit, [1984]

Effects of the CT display window on detectability of large and small lesions

D. A. Twible, P. F. Judy, R. G. Swensson, [1984]

Radiation dose levels associated with newer CT scanner units

A. Jacobson, R. J. P. Osborne, [1984]

Application of Optical Instrumentation in Medicine XIII

Digital image processing: optimal spatial filter for maximization of the perceived SNR based on a statistical decision theory model for the human observer

H. -P. Chan, C. E. Metz, K. Doi, [1985]

Is ideal-observer signal-to-noise ratio a good predictor of human performance?

K. J. Meyers, H. H. Barrett, M. C. Borgstrom, D. D. Patton, G. W. Seeley, [1985]

Detection of disks in CT noise

D. R. Jacobson, [1985]

Shift variance in digital radiographic imaging systems as a source of error in contrast detail measurements

J. A. Bencomo, L. M. Marsh, T. J. Morgan, A. Cole, C. E. Willis, [1985]

Quantitative description or characterization of three image receptors for use in extraoral radiology

L. Chavarria Jr., T. J. Morgan, J. A. Bencomo, D. J. Finn, [1985]

Detectability of lesions of various sizes on CT images

P. F. Judy, R. G. Swenson, [1985]

A matched filter for the visual perception of a dynamic display

J. Vanregemorter, F. Deconinck, [1985]

Detection and identification efficiency: an update

A. E. Burgess, [1985]

Progress in signal and texture discrimination in medical imaging

R. F. Wagner, M. F. Insana, D. G. Brown, [1985]

Quantifying the performance of imaging systems

H. H. Barrett, W. E. Smith, K. J. Myers, T. D. Milster, R. D. Fiete, [1985]

Image processing: mathematics, engineering, or art?

K. M. Hanson, [1985]

Synthesis of arbitrary x-ray projections from a finite number of existing projections

R. L. Webber, U. E. Ruttimann, R. A.J. Groenhuis, P. Edholm, [1985]

Ectomographic filtering applied to tomographic digital subtraction angiography

B. C. Yih, D. N. Ghosh Roy, R. A. Kruger, S. P. Del Rio, R. L. Power, [1985]

Application of Optical Instrumentation in Medicine XIII (*cont.*)

Application of iterative reconstruction techniques to conventional circular tomography

D. N. Ghosh Roy, R. A. Kruger, B. C. Yih, S. P. Del Rio, R. L. Power, [1985]

Rapid circular tomography system suitable for cardiac imaging

R. A. Kruger, J. A. Sorenson, J. R. Boye, J. Conrad, S. P. Del Rio, B. C. Yih, P. Liu, [1985]

Some characteristics of diagnostic scatter radiation

K. -S. Chuang, H. K. Huang, [1985]

A scatter correction algorithm for digitally acquired radiographs (SCADAR)

J. M. Boone, B. A. Arnold, [1985]

Principles governing the transfer of signal modulation and photon noise by amplifying and scattering mechanisms

P. L. Dillon, J. F. Hamilton, M. Rabbani, R. Shawa, R. L. Van Metter, [1985]

Monte Carlo studies of image spread by x-ray intensifying screens

E. Caruthers, [1985]

Radiation transfer in medical x-ray intensifying screens

D. J. Mickish, [1985]

The effect of bias exposure on the detective quantum efficiency of radiographic screen-film systems

R. L. Van Metter, R. Shaw, [1985]

Comparison of theory and experiment for the DQE of a radiographic screen-film system

P. C. Bunch, K. E. Huff, R. Shaw, R. L. Van Metter, [1985]

The role of screen and film in determining the noise-equivalent number of quanta recorded by a screen-film system

R. Shaw, R. L. Van Metter, [1985]

Image quality of radiographic systems as evaluated by direct signal-to-noise ratio measurements

R. Bollen, [1985]

Some results in multi-energy digital radiology

G. Vernazza, F. Caratozzolo, S. B. Serpico, S. Geraci, [1985]

Optical transfer function of digital radiographic system

B. Bianco, G. Vernazza, F. Beltrame, L. Venzano, E. Troina, [1985]

Application of Optical Instrumentation in Medicine XIII (*cont.*)

Veiling-glare of a linear multichannel Si (Li) detector

H. D. Zemen, E. B. Hughes, J. N. Otis, A. C. Thompson, J. T. Walton, [1985]

Sensitivity characteristics of a prototype selenium plate detection system for digital radiographic imaging

P. J. Papin, N. J. Mankovich, H. K. Huang, [1985]

New capabilities of ultrasonic imaging for tissue characterization and medical diagnosis

J. L. Bernatets, J. Pergrale, [1985]

A comparison of ultrasound dynamic focus phased arrays with fixed focus mechanical scanners

C. Kimme-Smith, J. Winter, W. King III, N. Worthen, [1985]

Explososcan: a parallel processing technique for high speed ultrasound imaging with linear phased arrays

D. P. Shattuck, M. D. Weinshenker, S. W. Smith, O. T. van Ramm, [1985]

Flow measurement by magnetic resonance imaging

K. Barth, M. Deimling, P. Fritschy, E. Mueller, E. R. Reinhardt, [1985]

Optimization techniques in magnetic resonance imaging

N. M. Hylton, D. A. Ortendahl, L. Kaufman, L. Crooks, [1985]

Influence of small phase variations in the diffraction pattern of a biological cell

M. Chevalier, M. L. Calvo, C. Cerreras, [1985]

Clinical experience with the ophthalmic image processing system (IS 2000)

P. G. Rehkopf, J. W. Warnicki, M. R. Nelson, J. L. Cambier, S. I. Brown, [1985]

Digital analysis of rotated images

S. Alliney, [1985]

Medical Imaging and Instrumentation '85

Efficacy of SER in chest diagnosis

J. C. Wandtke, D. B. Plewes, [1985]

Signal/noise and sensitometry limitations in chest radiography: implications of regional exposure

D. B. Plewes, C. G. Shaw, M. Ivanovich, [1985]

Effect of a multiple-scanning beam device and trough filter on scatter in chest radiography

D. R. Bednarek, S. Rudin, R. Wong, R. Kaczmarek, [1985]

Comparison of chest filters

G. Schiller, A. Olson, H. Nguyen, [1985]

Comparative performance of a standard and high line rate video imaging system in a cardiac catheterization

R. P. Rossi, C. Ahrens, B. M. Groves, [1985]

Compact high resolution MRI phantom for multislice imaging

S. K. Mun, S. K. Hilal, J. B. Ra, I. K. Mun, H. D. Rosskothien, [1985]

Physics of high resolution sodium MRI of the brain

S. K. Mun, J. B. Ra, S. K. Hilal, S. W. Lee, Z. H. Cho, I. K. Mun, [1985]

Fabrication and performance of cylindrical iron shields for MRI systems

M. J. Flynn, J. Ewing, J. Froelich, C. Issa, B. Vavrek, [1985]

3-D object repositioning

M. Michalski, H. Rabal, M. Garavaglia, [1985]

Pseudo-3D imaging with the DICOM-8

S. Shalev, J. Arenson, B. Kettner, [1985]

Signal-to-noise-ratio measurements on two high-resolution screen-film systems

P. C. Bunch, K. E. Huff, [1985]

Low print-through technology with rare earth tantalate phosphors

L. Brixner, R. S. Holland, R. E. Kellogg, D. Michkish, S. H. Patten, W. Zegarski, [1985]

High stability developer for medical x-ray processing

P. Wuelfing Jr., [1985]

Medical Imaging and Instrumentation '85 (*cont.*)

A comparison of freshly exposed and pre-exposed control film in the evaluation process

O. H. Suleiman, A. W. Thomas, [1985]

Port film enhancement by digital processing

S. Shalev, C. -W. Cheng, J. Arenson, [1985]

The physical basis of diaphanography

S. Shalev, J. Linford, J. Bews, J. Arenson, [1985]

Performance evaluation of a new dedicated mammography system

R. P. Rossi, R. E. Hendrick, [1985]

Process studies on higher sensitivity xeromammography

L. S. Jeromin, R. C. Speiser, [1985]

Dedicated vs. add on: a comparison of digital systems

J. T. Eisenbarth, [1985]

Evaluation of DSA image quality

R. S. Wenstrup, [1985]

Acceptance testing and calibration of digital subtraction angiography systems

P.-J. Paul Lin, A. Olson, [1985]

Utilization of the Monte Carlo technique to assess precision in the measurement of coronary arteries

T. Sandor, J. R. Spears, L. M. Buxt, D. C. Levin, W. B. Hanlon, D. P. Harrington, A. P. Selwyn, S. Paulin, [1985]

Toward/millisecond scanning beam radiography

S. Rudin, D. R. Bednarek, R. Wong, R. Kaczmarek, [1985]

Personnel exposure in interventional radiology

R. L. Morin, A. Young, J. Staiger, K. Nelson, J. Cardella, [1985]

Bone mineral assessment with dual energy computerized tomography (CT) imaging

E. L. Nickoloff, F. Feldman, [1985]

Spinal bone mineral determination using automated contour detection: application to single and dual energy CT

T. Sandor, W. A. Kalender, W. B. Hanlon, B. N. Weissman, C. Rumbaugh, [1985]

Medical Imaging and Instrumentation '85 (*cont.*)

An investigation of computed tomography (CT) linearity

R. J. Kriz, K. J. Strauss, [1985]

The effect of CT reconstruction time upon patient throughput in a university setting

R. L. Morin, D. Munsinger, [1985]

X-ray micro-CT scanner for biomedical applications

F. H. Seguin, P. J. Bjorkholm, P. Burstein, M. Annis, F. Homburger, R. A. Adams, [1985]

Design and implementation of PACS at Georgetown University Hospital

S. K. Mun, H. R. Benson, P. Choyke, F. H. Fahey, P. C. Wang, P. K. Zeman, L. P. Elliott, [1985]

Implications of picture archiving and communication systems (PACS) for the practice of radiology

P. L. Choyke, S. K. Mun, M. H. Jaffe, H. R. Benson, F. H. Fahey, P. C. Wang, [1985]

Subtraction angiography: comparative performance and cost of digital vs. film subtraction methods

M. J. Flynn, S. Patel, J. Zerwekh, J. Clark, S. Wilderman, [1985]

The effect of digital unsharp masking on the detectability of interstitial infiltrates and pneumothoraces

H. MacMahon, C. Vyborny, V. Sabeti, C. Metz, K. Doi, [1985]

ANDS-V1 computer detection of lung nodules

W. A. Lampeter, [1985]

Chest radiography using patient-specific digitally-prepared compensating filters

B. H. Hasegawa, S. Naimuddin, J. T. Dobbins III, C. A. Mistretta, W. W. Peppler, N. J. Hangiandreou, J. T. Cusma, J. C. McDermott, B. V. Kudva, K. M. Melbye, [1985]

Scanned projection digital mammographic imaging

M. J. Yaffe, R. M. Nishikawa, A. Fenster, I. A. Cunningham, G. E. Mawdsley, [1985]

Application of Optical Instrumentation in Medicine XIV

Acoustic nuclear magnetic resonance in biological tissue

K. J. Myers, T. J. Hirsch, H. H. Barrett, [1986]

The applications of fluorine-19 NMR in medicine

S. R. Thomas, [1986]

Perfluorocarbon compounds: applications in diagnostic imaging

R. F. Mattrey, [1986]

A statistical approach to an expert diagnostic ultrasonic system

M. F. Insana, R. F. Wagner, B. S. Garra, T. H. Shawker, [1986]

PET imaging of the chemistry in the brain

H. N. Wagner Jr, [1986]

Dual energy imaging in projection radiography

H. Takeuchi, K. -S. Chuang, H. K. Huang, [1986]

Principal components analysis in medical imaging

J. B. Weaver, A. L. Huddleston, [1986]

Application of digital fluoroscopic image data in radiation dosimetry

T. K.M. Nair, F. M. Edwards, K. W. Logan, [1986]

Sources of noise in high resolution screen-film radiography

P. C. Bunch, K. E. Huff, R. Van Metter, [1986]

A comparison of physical autocorrelation and digital Wiener spectrum techniques for screen-film evaluation

R. Shaw, M. Rabbani, [1986]

Computer simulation of radiographic screen-film images

Development of a high-resolution camera tube for medical imaging

N. V. Rao, [1990]

Scanned-slot digital mammography

Andrew D.A. Maidment, Martin J. Yaffe, [1990]

Determination of x-ray phosphor scintillation spectra

Daniel J. Mickish, Jacob Beutel, [1990]

Improved SPECT via cone-beam collimation, the expectation maximization algorithm, and accurate attenuation correction

A. Welch, S. Webb, M. Flower, [1990]

Effect of protective layer on resolution properties of photostimulable phosphor detector for digital radiographic system

Masayuki Nakazawa, Osamu Morikawa, Masaaki Nitta, Hisanori Tsuchino, Fumio Shimada, [1990]

Preliminary image-quality measurements on a digital scanned projection radiography system

Steven L. Fritz, Ching-Shan Rick Lee, Steven R. Roys, [1990]

X-ray imaging with 2048 x 2048 CCD array

John M. Herron, Eric G. Daxon, David Gur, Walter F. Good, Glenn S. Maitz, Stephen L. Miller, [1990]

Lens optical coupling versus fiber optical coupling: the impact on x-ray TV image quality with CCDs and pick-up tubes

Hartmut Sklebitz, [1990]

Medical Imaging IV: Image Formation (*cont.*)

Evaluation of basic imaging properties of a new digital chest system

Steven M. Montner, Xin-Wei Xu, Masatoshi Tsuzaka, Kunio Doi, Heber MacMahon, Hitoshi Yoshimura, Shigeru Sanada, Maryellen Lissak Giger, Fang-Fang Yin, [1990]

Effects of a-priori information on detection of simulated lung nodules in digital chest radiography

George W. Seeley, Kelly Rehm, William J. Dallas, [1990]

Digital video system for on-line portal verification

Konrad W. Leszczynski, Shlomo Shalev, N. Scott Cosby, [1990]

Digital methods for reducing radiation exposure during medical fluoroscopy

Ernest W. Edmonds, John A. Rowlands, David M. Hynes, B. D. Toth, Anthony J. Porter, [1990]

Linear analysis of rotationally invariant, radially variant tomographic imaging systems

John Robert Baker, Ronald H. Huesman, Thomas F. Budinger, [1990]

Real-time sensing of mouth 3-D position and orientation

Grigore C. Burdea, Stanley M. Dunn, Matsumita Mallik, Heesung Jun, [1990]

New PRIMICON pick-up tube for multimode x-ray TV cameras

Emmanuel Calais, Pascal Joffre, [1990]

Low-frequency transmission of the chest in an outpatient population: implications for the AMBER imaging system

Henri E. A. S. J Lemmers, Leo J. Schultze Kool, H. J. van Elburg, Richard L. Van Metter, [1990]

Photostimulable phosphor imaging applications in molecular biology

John Lobick, James H. Kimura, Nancy Wood, [1990]

Mammography phantom utilizing free-response receiver operating characteristic methodology

Douglas Pfeiffer, Dev Prasad Chakraborty, [1990]

Initial experience with a CCD-based imaging system

Dinko Plenkovich, [1990]

Neural network scatter correction technique for digital radiography

John M. Boone, J. Anthony Seibert, [1990]

Digital x-ray imaging with two-dimensional charge-coupled device arrays

John M. Herron, David Gur, Eric G. Daxon, Walter F. Good, Chris C. Shaw, Glenn S. Maitz, Joseph W. Boyer, [1990]

Medical Imaging IV: Image Formation (*cont.*)

New method to determine the lower limits in patient exposure: stacked computed radiography image detectors

Hans Roehrig, Theron W. Ovitt, George W. Seeley, David A. Yocky, William J. Dallas, [1990]

Use of computed radiography for portal imaging

Hans Roehrig, W. Lutz, Gideon Barnea, Gerald D. Pond, William J. Dallas, [1990]

Direct scatter distribution measurements: comparison to Monte Carlo simulations

J. Anthony Seibert, John M. Boone, [1990]

Performance analysis of medical x-ray film digitizers

Kwok Leung Yip, Anthony Richard Lubinsky, Bruce R. Whiting, Edward Muka, Thomas E. Kocher, [1990]

Digital and optically filtered clinical colposcopic images

Eric R. Craine, Brian L. Craine, [1990]

Improved differentiating filter function for computing line spread functions in MTF calculations

Jacob Beutel, [1990]

Medical Imaging V: Image Physics

Decoupled coil detector array in magnetic resonance imaging

Doron Kwiatt, Shmuel Einav, [1991]

Magnetic resonance reconstruction from projections using half the data

Douglas C. Noll, John M. Pauly, Dwight G. Nishimura, Albert Macovski, [1991]

Anatomical constraints for neuromagnetic source models

John S. George, Paul S. Lewis, D. M. Ranken, L. Kaplan, C. C. Wood, [1991]

Improved real-time volumetric ultrasonic imaging system

Henry G. Pavy, Stephen W. Smith, Olaf T. Von Ramm, [1991]

Three-dimensional real-time ultrasonic imaging using ellipsoidal backprojection

Forrest L. Anderson, [1991]

Modeling ultrasound speckle formation and its dependence on imaging system's response

Navalgund A. H. K. Rao, Hui Zhu, [1991]

Scan-free echo imaging of dynamic objects

Mehrdad Soumekh, [1991]

Signal, noise, and readout considerations in the development of amorphous silicon photodiode arrays for radiotherapy and diagnostic x-ray imaging

Larry E. Antonuk, J. Boudry, Chung-Won Kim, M. Longo, E. J. Morton, John Yorkston, Robert A. Street, [1991]

Signal-to-noise performance in cesium iodide x-ray fluorescent screens

Walter Hillen, W. Eckenbach, Peter Quadflieg, Thomas T. Zaengel, [1991]

Evaluation of a moving slit technique for mammography

Marc S. Rosenthal, Donald Sashin, John M. Herron, Glenn S. Maitz, Joseph W. Boyer, David Gur, [1991]

Equalization radiography with radiation quality modulation

Ronald J. Geluk, Hugo Vlasbloem, [1991]

Technical and clinical evaluations of a 2048 x 2048-matrix digital radiography system for gastrointestinal examinations

Toshihiro Ogura, Yukihisa Masuda, Hiroshi Fujita, Nobuo Inoue, Fukuo Yonekura, Yoshihiro Miyagi, Kazuaki Takatsu, Katsuyoshi Akahira, Shigehiko Tsuruta, Masami Kamiya, Fumitaka Takahashi, Kazuyuki Oda, Shigeyuki Ikeda, Kouichi Koike, [1991]

Low-dose magnetic-field-immune biplanar fluoroscopy for neurosurgery

P. A. Ramos, Michael A. Lawson, Kevin G. Wika, Stephen W. Allison, E. G. Quate, J. A. Molloy, Rogers C. Ritter, George T. Gilles, [1991]

Medical Imaging V: Image Physics (*cont.*)

Task performance based on the posterior probability of maximum-entropy reconstructions obtained with MEMSYS 3

Kyle J. Myers, Kenneth M. Hanson, [1991]

Perceptual noise measurement of displays

Dev Prasad Chakraborty, Douglas Pfeiffer, Inna Brikman, [1991]

Color analysis of nonlinear-phase-modulation method for density pseudocolor encoding technique in medical application

Ding-yu Liu, Xiaobo Yang, Changjun Liu, Honguo Zhang, [1991]

Compact open-architecture computed radiography system

H. K. Huang, Art J. Lim, Hooshang Kangarloo, Sandra Lee Eldredge, Mansur Loloyan, Keh-Shih Chuang, [1991]

Simultaneous patient translation during CT scanning

Carl R. Crawford, Kevin F. King, [1991]

Spline-based tomographic reconstruction method

Jean-Pierre V. Guedon, Yves J. Bizais, [1991]

Use of cross-validation as a stopping rule in emission tomography image reconstruction

Kevin J. Coakley, Jorge Llacer, [1991]

Clinical image-intensifier-based volume CT imager for angiography

Ruola Ning, John B. Barsotti, Daniel K. Kido, Robert A. Kruger, [1991]

CT imaging with an image intensifier: using a radiation therapy simulator as a CT scanner

Michael D. Silver, Masayuki Nishiki, Katsumi Tochimura, Masataka Arita, Bruce M. Drawert, Thomas C. Judd, [1991]

Three-dimensional reconstruction from cone beam projection by a block iterative technique

Francoise Peyrin, Robert Goutte, Michel Amiel, [1991]

Three-dimensional reconstruction from cone beam projections

Satoru Ohishi, Masahiro Yamaguchi, Nagaaki Ohyama, Toshio Honda, [1991]

Confocal light microscopy of the living in-situ ocular lens: two- and three-dimensional imaging

Barry R. Masters, [1991]

Tomographic imaging using picosecond pulses of light

Jeremy C. Hebden, Robert A. Kruger, Kam Sing Wong, [1991]

Medical Imaging VI: Instrumentation

Two- and three-dimensional views of biomagnetic imaging

William J. Dallas, [1992]

Variable-parameter magnetic resonance imaging

David M. Kramer, John Coleman, Leon Kaufman, Leila D. Mattinger, [1992]

Switched-field magnetic resonance imaging

Joseph W. Carlson, Larry E. Crooks, M. Arakawa, D. M. Goldhaber, David M. Kramer, Leon Kaufman, [1992]

Spatial sampling considerations for biomagnetic measurements

Heidi A. Schlitt, William J. Dallas, Walter H. Kullmann, [1992]

Solution to the inverse problem in selective excitation in magnetic resonance imaging

Joseph W. Carlson, [1992]

Exposure latitude for thoracic radiography

Richard L. Van Metter, Henri E. A. S. J Lemmers, Leo J. Schultze Kool, [1992]

Film/screen system optimization through the application of radiation transfer models to digitized phantom images

Jacob Beutel, Michael Yampolsky, Rodney Shaw, [1992]

Optimization of peak kilovoltage and spectral shape for digital mammography

Rebecca Fahrig, Andrew D.A. Maidment, Martin J. Yaffe, [1992]

Dual-energy x-ray absorptiometry using a multielement high-purity germanium detector array: technical considerations

Eric L. Gingold, Bruce H. Hasegawa, Christopher E. Cann, Andrew D. Jeffries, [1992]

Development of thin-film flat-panel arrays for diagnostic and radiotherapy imaging

Larry E. Antonuk, J. Boudry, John Yorkston, E. J. Morton, Weidong Huang, Robert A. Street, [1992]

High-resolution digital x-ray imaging with solid state linear detectors

Bernard Munier, P. Prieur-Drevon, G. Roziere, Jean Chabbal, [1992]

Comparison of three different schemes for dual-energy subtraction imaging in digital radiography: a signal-to-noise analysis

Chris C. Shaw, David Gur, [1992]

Pixel averaging versus digitization using larger apertures: a comparison of the spatial resolution properties

Chris C. Shaw, John M. Herron, David Gur, [1992]

Medical Imaging VI: Instrumentation (*cont.*)

Large-area solid state detector for radiology using amorphous selenium

Wei Zhao, John A. Rowlands, [1992]

Comparison of imaging characteristics of multiple-beam equalization and storage phosphor direct digitizer radiographic systems

A. Sankaran, Keh-Shih Chuang, Hisashi Yonekawa, H. K. Huang, [1992]

Signal fading, erasure, and rescan in storage phosphor imaging

Chris C. Shaw, John M. Herron, David Gur, [1992]

Novel technique for simultaneous acquisition of primary and scatter image signals

Chris C. Shaw, [1992]

Medical linear accelerator x-ray sources: variation with make, model, and time

David A. Jaffray, Jerry J. Battista, Aaron Fenster, Peter Munro, [1992]

Physical characterization and optimal magnification of a portal imaging system

Jean-Pierre Bissonnette, David A. Jaffray, Aaron Fenster, Peter Munro, [1992]

Image-intensifier-based volume tomographic angiography imager: preliminary results

Ruola Ning, Steven J. Rooker, John B. Barsotti, Thomas W. Morris, [1992]

Volume CT of anthropomorphic phantoms using a radiation therapy simulator

Michael D. Silver, Mitsuru Yahata, Yasuo Saito, E. Anne Sivers, S. R. Huang, Bruce M. Drawert, Thomas C. Judd, [1992]

Bremsstrahlung imaging with the gamma camera

Maria Kallergi, Wei Qian, Laurence P. Clarke, Allan R. Gondeck, [1992]

SPECT imaging: the spatial distribution of detected photons about a point source in a scatter medium

T. van Doorn, Zixin Zhang, Milka Zec, [1992]

Mammographic imaging properties of an experimental SrFBr:Eu²⁺ imaging plate

Yuichi Hosoi, Hiroki Saito, Yasushi Kojima, Satoshi Arakawa, Kenji Takahashi, [1992]

Three-dimensional ellipsoidal backprojection images from large arrays

Forrest L. Anderson, [1992]

New thermographic imaging techniques: panoramic and multiaspect thermography

Akinori Nagasawa, Kazuichi Katoh, Yasuhiko Ohhashi, [1992]

Importance of TV camera tube parameters in fluoroscopic imaging

William Bitler, James G. Coffin, Walter Doesschate, Robert M. Langdon, Gregory J. Murphy, [1992]

Medical Imaging VI: Image Capture, Formatting, and Display

Performance characteristics of asymmetric zero-crossover screen-film systems

Phillip C. Bunch, [1992]

Radiographic equalization using computer-controlled filter wheels

John M. Boone, [1992]

CCD array for measuring spread functions

J. Anthony Seibert, John M. Boone, Steven M. Burns, [1992]

Medical Imaging 1993: Physics of Medical Imaging

New type of xerographic x-ray camera

Shunji Shirouzu, Soichi Inoue, [1993]

Enhanced imaging process for xeroradiography

William D. Fender, Eddie M. Zanrosso, [1993]

Large area, flat-panel a-Si:H arrays for x-ray imaging

Larry E. Antonuk, John Yorkston, Weidong Huang, J. Boudry, E. J. Morton, Robert A. Street, [1993]

$\text{Cd}_{1-x}\text{Zn}_x\text{Te}$ detector imaging array

Jack F. Butler, Stan J. Friesenhahn, Clinton L. Lingren, Boris A. Apotovsky, F. Patrick Doty, William L. Ashburn, William P. Dillon, [1993]

X-ray sensitive video camera

Randy Luhta, John A. Rowlands, [1993]

Development of a 4000-scanning-lines high-resolution TV camera for real-time digital radiography system

Hisatake Yokouchi, Yoichi Onodera, Yukio Takasaki, [1993]

Temporal and spatial statistics of image noise in real-time video imaging: a study on on-line portal imaging

Rasika Rajapakshe, Thomas J. Radcliffe, Shlomo Shalev, [1993]

Physics and optics of a new gamma camera design

Daniel Gagnon, Sylvain Rioux, Nicole Pouliot, Michel Therrien, Luc Laperriere, Alexandre Jouan, Patrick Olivier, [1993]

Analysis of the detective quantum efficiency of coupling a CCD to a scintillating phosphor for x-ray microtomographic imaging

Michael S. Westmore, Ian A. Cunningham, [1993]

Imaging performance of a prototype scanned-slot digital mammography system

Andrew D.A. Maidment, Martin J. Yaffe, Donald B. Plewes, Gordon E. Mawdsley, Ian C. Soutar, Brian G. Starkoski, [1993]

Dentomaxillofacial imaging with computed-radiography techniques: a preliminary study

Chris C. Shaw, Stanley F. Kapa, Audrey J. Furkart, David Gur, [1993]

Digital radiology using self-scanned readout of amorphous selenium

Wei Zhao, John A. Rowlands, [1993]

Basic investigation of dual-energy x-ray absorptiometry for bone densitometry using computed radiography

Kazuo Shimura, Nobuyoshi Nakajima, Hiroshi Tanaka, Masamitsu Ishida, Hisatoyo Kato, [1993]

Medical Imaging 1993: Physics of Medical Imaging (*cont.*)

Performance evaluation of an XRII-based volume CT scanner

David W. Holdsworth, Maria Drangova, Aaron Fenster, [1993]

High-resolution dynamic CT scanner based on a variable-zoom XRII and a linear photodiode array

Maria Drangova, David W. Holdsworth, Aaron Fenster, [1993]

Image intensifier-based volume tomographic angiography imaging system: work in progress

Ruola Ning, Steven J. Rooker, [1993]

Reconstruction of magnetic resonance images from EPI data

Roderick W. McColl, Geoffrey D. Clarke, Ronald M. Peshock, [1993]

Low-frame-rate pulsed fluoroscopy vs low-exposure-rate continuous fluoroscopy: a comparison

Steven L. Fritz, Steven R. Roys, Zoran Doric, James H. Duncan, [1993]

Lag vs noise in fluoroscopic imaging

Gregory J. Murphy, William Bitler, James G. Coffin, Robert M. Langdon, [1993]

Development of a dual-energy kinestatic charge detector

Robert J. Endorf, Sunil Kulatunga, David C. Spelic, Frank A. DiBianca, Herbert D. Zeman, [1993]

Experimental study of x-ray detector resolution in medical imaging: physical parameters and timing electronics techniques

George C. Giakos, Frank A. DiBianca, [1993]

Ionic mobility dispersion in KCD digital radiography: dopants and physical parameters

Frank A. DiBianca, George C. Giakos, [1993]

Digital x-ray cameras for real-time stereotactic breast needle biopsy

Hans Roehrig, Laurie L. Fajardo, Tong Yu, [1993]

High-accuracy x-ray imaging: screen, lens, and CCD

Herbert D. Zeman, Frank A. DiBianca, Donald B. Thomason, Jeno I. Sebes, Gunnar Lovhoiden, D.-Z. Liao, Dona Kambeyanda, [1993]

Computer-simulated multiple beam equalization: image processing algorithm and research tool for Amber

Berend C. Stoel, Johan H. C. Reiber, Jorg W. Oestmann, Henri A. Vrooman, Henri E. A. S. J Lemmers, Leo J. Schultze Kool, [1993]

Medical Imaging 1993: Physics of Medical Imaging (*cont.*)

Laboratory measurements of sensitometry, MTF, veiling glare, Wiener spectrum and DQE for image intensifier tubes

Robert M. Gagne, Charles N. West, Robert F. Wagner, P. W. Quinn, [1993]

Evaluation of x-ray sources for mammography

Robert J. Jennings, P. W. Quinn, Robert M. Gagne, Thomas R. Fewell, [1993]

X-ray beam quality effects and light diffusion modeling of screens

David P. Trauernicht, Byron R. Sever, [1993]

Performance characteristics of a flexible antiscatter grid used in computed radiography

Richard L. Van Metter, David P. Trauernicht, David J. Steklenski, [1993]

Design and performance characteristics of a collector for high-efficiency detection of photostimulable-phosphor emissions

Michael B. Brandt, [1993]

High-resolution computed radiography by scanned luminescent toner xeroradiography

John W. May, Anthony Richard Lubinsky, [1993]

Image-quality characteristics of a film-screen system for chest radiology based on ultravision technology

E. G. Saurborn, Sandra L. Issler, Michael Yampolsky, Jacob Beutel, Rodney Shaw, [1993]

Comparison of digital Wiener-spectrum calculation methods for screen-film evaluation

Jacob Beutel, Michael Yampolsky, Rodney Shaw, [1993]

Limitations on contrast sensitivity and dynamic range imposed by human-eye response characteristics, film-density, and radiographic viewing conditions

Earle L. Kitts, [1993]

Application of neural networks to computer-aided pathology detection in mammography

Richard G. Stafford, Jacob Beutel, Daniel J. Mickewich, S. L. Albers, [1993]

Comparison of filter material and design for use in ROI angiography

Stephen Rudin, Daniel R. Bednarek, [1993]

White-light and broadband laser for medical imaging

Alexander M. Izmailov, Galina G. Kund, Andrey G. Zhiglinskiy, [1993]

Junction CCD-based x-ray sensor for dental applications

Antonius J.G. Spiekerman, J. A. Willemsen, E. J. van Leeuwen, [1993]

Medical Imaging 1993: Physics of Medical Imaging (*cont.*)

Ultrasonic texture motion analysis: theory and simulation

Jean Meunier, [1993]

Optical specifications for pseudocolor diagnosis

Ding-yu Liu, [1993]

Use of noise and signal-source covariance matrices in reconstructing biocurrent distributions from biomagnetic measurements

Kensuke Sekihara, Bernard Scholz, [1993]

Medical images transmission technique with holographic scanners

Ding-yu Liu, Tong-Zhao Gu, [1993]

Developmental thermography: triple aspect thermography

Akinori Nagasawa, Kazuichi Katoh, [1993]

Developmental thermography: multiple aspect thermography

Akinori Nagasawa, Kazuichi Katoh, [1993]

Developmental thermography: panoramic thermography

Akinori Nagasawa, Kazuichi Katoh, [1993]

Medical Imaging 1994: Physics of Medical Imaging

Multiparameter optimization of mammography: an update

Hamid Jafroudi, E. Philip Muntz, Robert J. Jennings, [1994]

Performance characteristics of high-MTF screen-film systems

Phillip C. Bunch, [1994]

Image quality characteristics of a high-speed film-screen system based on Ultra-Vision technology

Jacob Beutel, Sandra L. Issler, Daniel J. Mickewich, Rodney Shaw, [1994]

X-ray tube voltage dependence of Rossmann's three factors in Wiener spectra of radiographic mottles of a low-speed screen/film system

Hidetaka Arimura, Takaharu Ikeda, Takeshi Ikari, Hideaki Kubota, Masao Matsumoto, Atsushi Takigawa, Nobuyuki Nakamori, Hitoshi Kanamori, [1994]

Statistical processes limiting the noise of a screen-film system

Jacob Beutel, Michael Yampolsky, Rodney Shaw, [1994]

Imaging performance of a terbium-doped fiber optic screen for diagnostic imaging

John M. Boone, Jeffrey W. Duryea, J. Anthony Seibert, [1994]

Medical imaging with reverse geometry x-radiography

Randolph F. Wojcik, Stan Majewski, Richard D. Albert, Thomas M. Albert, [1994]

Simultaneous acquisition of storage phosphor and asymmetric screen-film chest images using a hybrid cassette

Brent K. Stewart, Carolyn Kimme-Smith, Sandra L. Johnson, Timothy Johnson, Denise R. Aberle, [1994]

Analysis of a high-resolution computed radiography imaging plate versus conventional screen-film radiography for neonatal intensive care unit applications

Katherine P. Andriole, Charles A. Gooding, Robert G. Gould, H. K. Huang, [1994]

Improved automatic adjustment of density and contrast in FCR system using neural network

Hideya Takeo, Nobuyoshi Nakajima, Masamitsu Ishida, Hisatoyo Kato, [1994]

Evaluation of a selenium-based digital chest radiography system

Carey E. Floyd, Harrell G. Chotas, Carl E. Ravin, [1994]

High-resolution, high-frame-rate, flat-panel TFT array for digital x-ray imaging

Larry E. Antonuk, J. Boudry, Youcef El-Mohri, Weidong Huang, Jeffrey H. Siewerdsen, John Yorkston, Robert A. Street, [1994]

Medical Imaging 1994: Physics of Medical Imaging (*cont.*)

Fluoroscopic x-ray imaging with amorphous silicon thin-film arrays

Ulrich W. Schiebel, N. Conrads, Ing Norbert Jung, Martin Weibrecht, H. Wiczorek, Thomas T. Zaengel, M. J. Powell, I. D. French, C. Glasse, [1994]

Evaluation of the MTF for a-Si:H imaging arrays

John Yorkston, Larry E. Antonuk, N. Seraji, Weidong Huang, Jeffrey H. Siewerdsen, Youcef El-Mohri, [1994]

High-resolution digital x-ray imaging system based on the scintillating plastic microfiber technology

Won Y. Choi, James K. Walker, Zhenxue Jing, [1994]

Preliminary experience with acquisition of 2048² fluorographic images

David M. Hynes, Larry Mazurkewich, John A. Rowlands, Klaus S. Schulenburg, Ernest W. Edmonds, [1994]

Development of a technique for electronic assessment of the image quality of medical fluoroscopic systems

Henry Weatherburn, G. Manson, [1994]

Scatter and veiling glare corrections for quantitative digital subtraction angiography

Atila Ersahin, Sabee Y. Molloy, Yao-Jin Qian, [1994]

Effects of scattered x-rays on monoenergetic cone-beam 3D CT images

Kohji Inoue, Hitoshi Kanamori, Chikao Uyama, [1994]

Measurement of noise and resolution in x-ray computed microtomograms

Michael J. Flynn, David A. Reimann, Sean M. Hames, [1994]

Image-intensifier-based volume tomographic angiography imaging system: geometric distortion correction

Ruola Ning, Jonathan K. Riek, David L. Conover, [1994]

Reconstruction of positron emission tomography images using maximum a posteriori and mean field annealing techniques

Michael Symonds, Youn-Sik Han, Peter Santago, Wesley E. Snyder, [1994]

New cone-beam reconstruction algorithm and its application to circular orbits

Hui Hu, [1994]

Stenosed anthropomorphic vascular phantoms for digital subtraction angiography, magnetic resonance, and Doppler ultrasound investigations

Robert F. Smith, R. Frayne, Michel Moreau, B. K. Rutt, Aaron Fenster, David W. Holdsworth, [1994]

Medical Imaging 1994: Physics of Medical Imaging (*cont.*)

Digitization aliasing artifacts caused by grid-line patterns on high-resolution imaging system

Jun Wang, H. K. Huang, [1994]

Light photon equalization for laser film digitizers

Yoshiyuki Ishimitsu, H. K. Huang, [1994]

Application of CCDs to digital x-ray mammography

Brian P. Allen, [1994]

Visual impact of the nonzero spatial frequency quantum sink

Ian A. Cunningham, Michael S. Westmore, Aaron Fenster, [1994]

Direct x-ray sensing CCD array for intraoral dental x-ray imaging system

John D. Cox, Donald W. Williams, D. Scott Langford, [1994]

Design and optimization of a digital radiographic system with emphasis on TDI CCD scanning mammography

Laurence E. Court, Ian Ho, Robert D. Speller, A. Martinex-Davalos, David J. Miller, Gordon R. Hopkinson, Michael A. Cutter, Brian P. Allen, [1994]

Vertically integrated electronic x-ray imager for diagnostic radiology

John D. Cox, Donald W. Williams, D. Scott Langford, [1994]

Signal, noise, and detective quantum efficiency in CCD-based x-ray imaging systems for use in mammography

Hans Roehrig, Laurie L. Fajardo, Tong Yu, William V. Schempp, [1994]

Application of a Plumbicon TV camera tube in a 2000-line imaging system

Gregory J. Murphy, William Bitler, John Lybrook, Timothy L. Stevener, Marc W. Broemmelsiek, [1994]

Overcoming the 887 barrier for the SNR in an 8-bit A/D

Rasika Rajapakshe, Shlomo Shalev, [1994]

Monte Carlo simulation in SPECT: a comparison of two approaches

John G. Sled, Anna Celler, J. Scott Barney, Marija Ivanovic, [1994]

High-sensitivity digital radiography using an avalanche-type image pickup tube camera

Keiji Umetani, Tomoharu Kajiyama, Ken Ueda, Yukio Takasaki, Hisatake Yokouchi, [1994]

Phosphor-covered junction CCD x-ray sensor for dental imaging

Antonius J.G. Spiekerman, J. C. Staalenburg, E. J. van Leeuwen, [1994]

Medical Imaging 1994: Physics of Medical Imaging (*cont.*)

Phased array spatial-velocity imaging with FM-CW signaling

Mehrdad Soumekh, [1994]

Unbiased estimation of attenuation of soft biological tissue using the mean-power difference between two adjacent envelope samples

Lazar A. Shifrin, [1994]

New method of data acquisition in k-space in magnetic resonance imaging

Ramesh Chandra, Henry Rusinek, [1994]

New diagnostic method for squamous cell carcinoma using argon ion laser

Akinori Nagasawa, Kazuichi Katoh, [1994]

New diagnostic method for dental caries applying photothermal reaction on teeth to Nd:YAG laser irradiation

Akinori Nagasawa, Kazuichi Katoh, [1994]

Ultrasound introsopic image quantitative characteristics for medical diagnostics and refinements of physical noise rise reasons

Mikhail K. Novoselets, Sergiy P. Radchenko, Vitaliy A. Tsubin, Alexander N. Gridko, [1994]

Hydrogenated amorphous silicon (a-Si:H) based gamma camera--Monte Carlo simulations

Hyoung-Koo Lee, John S. Drewery, Wan Shick Hong, Tao Jing, Selig N. Kaplan, Ali Mireshgi, Victor Perez-Mendez, [1994]

Effects of scattered x-rays on cone-beam CT images

Kohji Inoue, Nobuyuki Nakamori, Hitoshi Kanamori, Masahiro Endo, [1994]
